Creative OMNI Alliance Audio Converter 5.Q: Android Development: String to Object conversion I have an issue regarding the conversion of Strings to Object. As far as I have seen and read about the conversion String to Object we always have to use reflection to convert an String to a certain object. I am sure that the below code is right. Is there any other way to convert the String to Object with out using reflection. Below is the code : public class MainActivity extends AppCompatActivity { @Override protected void onCreate(Bundle savedInstanceState) { super.onCreate(savedInstanceState); setContentView(R.layout.activity\_main); String str = "Name : Raghavan"; String str2 = "Hello"; Button btn = (Button) findViewById(R.id.btn); btn.setOnClickListener(new View.OnClickListener() { @Override
